Amendments to the Claims:

1. (Currently Amended) A method of collaboratively identifying, prioritizing, and resolving issues affecting a series administered by an originating entity, the series comprising a plurality of similar complex systems, the method being implemented over a computer network in communication with a first, second, and third computer device, the first computer device being adapted to be used by a customer in possession of a system in the series, the second computer device being adapted to be used by the originating entity, and the third computer device being adapted to be used by a committee comprised of a customer representative and an originating entity representative, the method comprising:

receiving at least one of an issue and a comment corresponding to the issue over the computer network, from at least one of the customer and the originating entity, on a discussion-capable electronic media configured to have a plurality of issues and a plurality of comments posted thereon and accessible to the first, the second, and a third computer device over the computer network;

accessing the electronic media by allowing the committee[[],] via the third computer device, access to the electronic media for the committee for the committee to separate the posted plurality of issues into rejected issues and action issues, at least partially based on the posted plurality of comments, and for the committee to prioritize the action issues;

assigning each action issue by allowing the committee[[],] via the third computer device, to assign each action issue to have a resolution investigation conducted thereon to at least one of the customer and the originating entity to have a resolution investigation conducted thereon and to send sending therewith a set of resolution directions for conducting the resolution investigation for each assigned action issue over the computer network to the at least one of the customer via the first computer device and the originating entity via the corresponding one of the first computer device and the second computer device;

RTA01/2156236v1

Appl. No.: 09/656,678

- receiving a resolution proposal, resulting from the corresponding resolution investigation, for each action issue over the computer network, from the at least one of the customer and the originating entity assigned the respective action issue, and such that the resolution proposals being are accessible by the committee via the third computer device[[,]] for the committee to evaluate the resolution proposals; and directing implementation of the resolution proposal for each evaluated action issue by allowing the committee[[,]] via the third computer device, ~~to direct the implementation of the resolution proposal for each evaluated action issue over the computer network, the committee and to then directing direct~~ closure of the action issue upon completion of implementation of the resolution proposal.
2. (Original) A method according to Claim 1 further comprising storing the rejected issues for at least one of further monitoring and future reference.
3. (Original) A method according to Claim 1 wherein allowing the committee to send a set of resolution directions further comprises allowing the committee to send a set of resolution directions comprising at least one of an assignment of the action issue to at least one of the customer and the originating entity, a suggested cost of the implementation of the resolution proposal, and a criteria for designating the action issue as being resolved.
4. (Original) A method according to Claim 1 wherein the originating entity comprises an aircraft manufacturer of a series of aircraft and receiving an issue further comprises receiving a non-safety issue.
5. (Currently Amended) A system for collaboratively identifying, prioritizing, and resolving issues affecting a series administered by an originating entity, the series comprising a plurality of similar complex systems, the system being implemented over a computer network and comprising:

- a first computer device adapted to be used by a customer and configured to be in communication with a computer network;
- a second computer device adapted to be used by the originating entity and configured to be in communication with the computer network;
- a third computer device adapted to be used by a committee comprised of a customer representative and an originating entity representative, the third computer device being configured to be in communication with the computer network; and
- a fourth computer device configured to be in communication with the first, second, and third computer devices over the computer network, the fourth computer device comprising:
 - a first processing portion configured receive at least one of an issue and a comment corresponding to the issue from at least one of the first computer device and the second computer device over the computer network;
 - a second processing portion responsive to the first processing portion and configured to post at least one of the issue and the comment on a discussion-capable electronic media accessible to the first, second, and third computer devices over the computer network, the electronic media being configured to have a plurality of issues and a plurality of comments posted thereon;
 - a third processing portion configured to ~~allow the committee, via~~ be responsive to the third computer device[,] ~~used by the committee, for the committee to:~~ access [to] the electronic media; ~~for the committee to~~ separate the posted plurality of issues into rejected issues and action issues, at least partially based on the posted plurality of comments; and [to] prioritize the action issues;
 - a fourth processing portion configured to ~~allow the committee, via~~ be responsive to the third computer device[, to] used by the committee, for the committee to:

assign each action issue to ~~have a resolution investigation conducted~~
thereon to at least one of the customer and the originating entity to
have a resolution investigation conducted thereon; and [to]
send a set of resolution directions for conducting the resolution
investigation for each assigned action issue over the computer
network to the at least one of the customer ~~via the first computer~~
~~device and the originating entity via the corresponding one of the~~
first computer device and the second computer device;
a fifth processing portion configured to receive a resolution proposal, resulting
from the corresponding resolution investigation, for each action issue over
the computer network, from the at least one of the customer and the
originating entity assigned the respective action issue and such that the
resolution proposals are accessible by the committee via the third
computer device, for the committee to evaluate the resolution proposals;
and
a sixth processing portion configured to ~~allow the committee, via~~ be responsive to
the third computer device[, to] used by the committee, for the committee
to:
direct [the] implementation of the resolution proposal for each evaluated
action issue over the computer network;[,] and to then
direct closure of the action issue upon completion of implementation of
the resolution proposal.

6. (Original) A system according to Claim 5 wherein the third processing portion is further configured to store the rejected issues for at least one of further monitoring and future reference.

7. (Original) A system according to Claim 5 wherein the set of resolution directions further comprises at least one of an assignment of the action issue to at least one of the customer and the

originating entity, a suggested cost of the implementation of the resolution proposal, and a criteria for designating the action issue as being resolved.

8. (Original) A system according to Claim 5 wherein the issues further comprise non-safety issues.

9. (Original) A system according to Claim 5 wherein the originating entity comprises a manufacturer of the series.

10. (Original) A system according to Claim 9 wherein the originating entity comprises an aircraft manufacturer of a series of aircraft.

11. (Previously Presented) A method of collaboratively identifying, prioritizing, and resolving issues affecting a series administered by an originating entity, the series comprising a plurality of similar complex systems, the method being implemented over a computer network in communication with a first, second, and third computer device, the first computer device being adapted to be used by a customer in possession of a system in the series, the second computer device being adapted to be used by the originating entity, and the third computer device being adapted to be used by a committee comprised of a customer representative and an originating entity representative, the method comprising:

receiving at least one of an issue and a comment corresponding to the issue over the computer network, from at least one of the customer and the originating entity via the respective computer device, on a discussion-capable electronic media configured to have a plurality of issues and a plurality of comments posted thereon and accessible to the first, the second, and the third computer devices over the computer network;

separating, by the committee, the posted issues into rejected issues and action issues at least partially based on the posted comments;

prioritizing, by the committee, the action issues;

assigning, by the committee, each action issue to an assignee, the assignee comprising at least one of the customer and the originating entity, the assignee for the respective action issue thereby being responsible for developing a resolution proposal for resolving that action issue;

sending, by the committee via the third computer device, each action issue with an associated set of resolution directions over the computer network to the assignee of the respective action issue via the respective computer device, the set of resolution directions including at least one issue-closure criteria to be met by the resolution proposal for the respective action issue;

receiving, by the committee, a resolution proposal for each action issue over the computer network from the respective assignee;

evaluating, by the committee, the resolution proposal for the respective action issue with respect to the issue-closure criteria;

directing, by the committee, implementation by at least one of the customer and the originating entity of the resolution proposal meeting the associated issue-closure criteria for each action issue; and

closing, by the committee, each action issue upon completion of implementation of the associated resolution proposal.

12. (Previously Presented) A method according to Claim 11 further comprising storing the rejected issues for at least one of further monitoring and future reference.

13. (Previously Presented) A method according to Claim 11 wherein assigning each action issue to an assignee further comprises assigning each action issue to an assignee according to the priority determined by the committee.

14. (Previously Presented) A method according to Claim 11 wherein sending each action issue with an associated set of resolution directions further comprises sending each action issue with

Page 8

an associated set of resolution directions including at least one of an implementation cost and an implementation deadline to be met by the resolution proposal for the respective action issue.

15. (Previously Presented) A method according to Claim 11 wherein the originating entity comprises an aircraft manufacturer of a series of aircraft and receiving an issue further comprises receiving a non-safety issue.

16. (Previously Presented) A method according to Claim 11 further comprising requesting, by the committee, approval of the at least one issue-closure criteria associated with each action issue, from at least the customer, prior to assigning the action issue to the assignee.

17. (Previously Presented) A method according to Claim 11 further comprising obtaining, by the committee, a commitment from at least the customer to implement a resolution proposal to the respective action issue meeting the at least one issue-closure criteria, prior to assigning the action issue to the assignee.
